Health Center Prescription Delivery Service

Interested in enrolling in our Prescription Delivery Service to campus residence halls?

If yes, then there are two things you need to do:

First, transfer your prescription. If your prescription is currently at another local pharmacy and you would like to transfer it to the IU Health Center, then all you need to do is complete this secure online form.

Second, we need you to grant your consent to deliver your medications to you. Please complete this consent form and bring it to the Health Center Pharmacy, along with your student ID, and you’ll be enrolled in our delivery program. Or, the next time you stop by, just ask the Pharmacy about it.

NOTE: The only prescriptions we cannot deliver are controlled substances (e.g., narcotics, psychostimulants) and pseudoephedrine (i.e, nasal decongestants), medications.
